# IM3100

## INTERFACES TO SELECT HEWLETT-PACKARD AND OKIDATA LASER PRINTERS

The IM3100 operates inline with select Hewlett-Packard and OKIDATA laser printers to eliminate the need to manually load printed documents into the pressure seal machine. The IM3100 attaches to the exit path of the printer so the printed forms can automatically be fed into the machine's feed path without operator assistance.

## CUSTOM ENGINEERED INLINE INTEGRATION FOR SEAMLESS PRINT, SEAL, AND MAIL PROCESSING

The IM3100 has been designed so all you have to do is design your mail piece on your computer, hit the print button, and retrieve the completed self-mailers in the IM3100's exit tray. You can even print two sided documents when the IM3100 is interfaced to the OKIDATA 711dn laser printer.
